

E-COMMERCE MARKETING PLATFORM

The future is here and it's chat-based

The Recovero platform brings it all together—
WhatsApp, SMS, customer data—creating new and
better ways to acquire, retain, and re-engage
customers.

Developer's Evaluation Task

People of Recovero

Recovero is a company built on the idea that personalized experiences can make all of your customers feel like rockstars. We're led by retention experts who have been running an email agency for years and scaled it into something much bigger - serving e-commerce brands worldwide!

The future of how brands interact with their customers is here and we're building the most powerful platform to help them reimagine what's possible.

It's been almost 2 years with Recovero. The journey itself is a memorable one but we are reaching our milestone soon. Great people, great work, amazing experience!

Manisha Khanna
Marketing Manager

Values that define us

Don't just survive life,
thrive in it.

Be open, honest, and
optimistic

You're the boss.
Own it

Deliver the best
customer experience

Do something kind, and
pass it on.
